Bunny abscess herbal treatment！Two months effective！

Save the expensive cost of surgery！Bunny reduce pain after surgery！

In early February 2015, the bunny's head suddenly grown a 2cm abscess. The master so sad to see it and took the bunny to see the veterinarian but quote an expensive surgery of HK$8,000. It's a pity that the master could not afford this cost. Finally, the master determined to find a panacea to cure the abscess from the Chinese herbal point of view. The progress is really satisfactory after two months of treatment, the abscess getting small, the bunny back to health and regain hearty appetite.

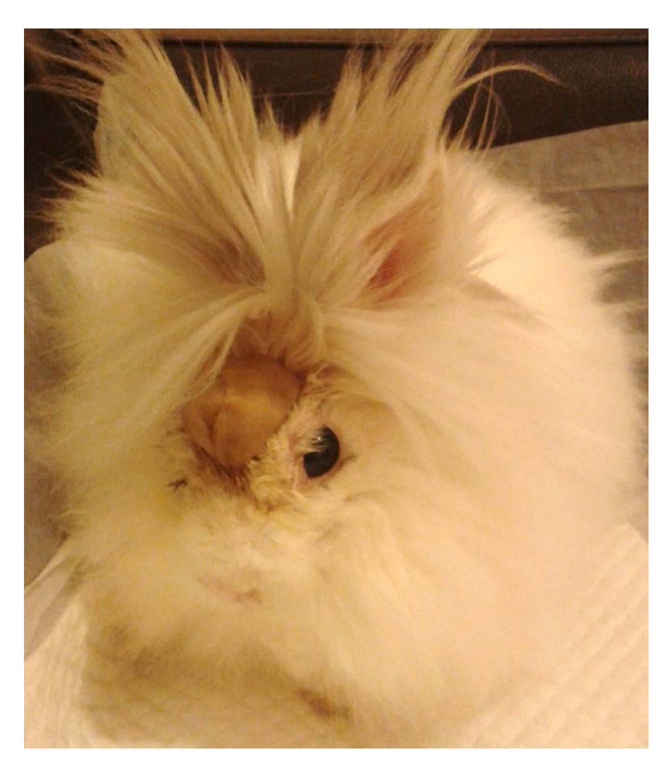

【For external use only】Viola philippica (32g)、Taraxacum (32g)、Dendranthema indicum (32g)，buy in the traditional Chinese medicine shops.

After bought from the Chinese medicine shop, each kind of herbs divided into (16g), stored in a vacuum box.

【Step】Viola philippica (16g), Taraxacum (16g), Dendranthema indicum (16g), put into the pot, add 4 glasses of water, middle fire for 45 minutes, take away the dregs, the liquid store into the thermos. Apply on the abscess twice a day (every 6 - 8 hours).

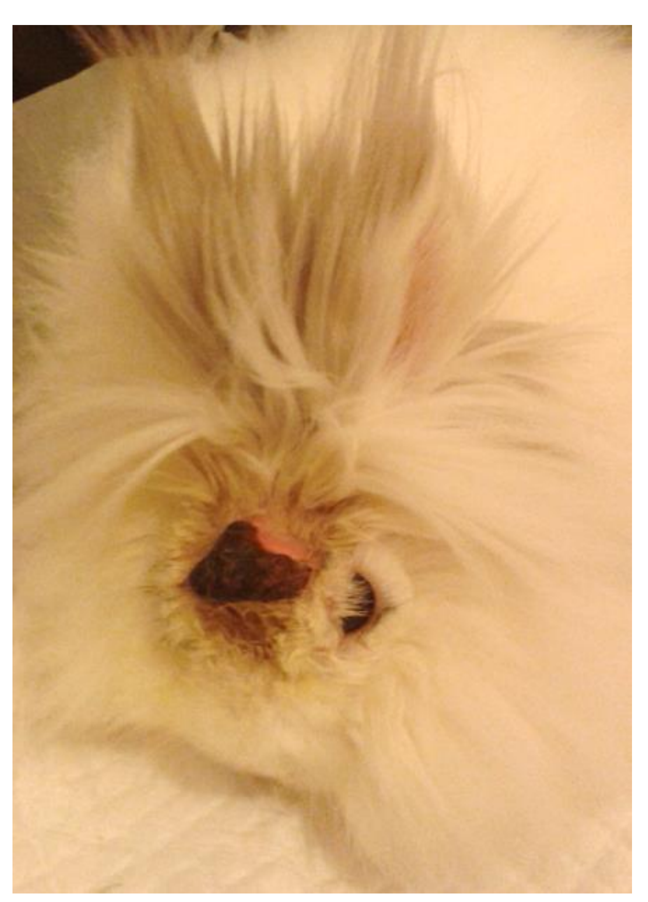

【External dressing】Poured the herbs liquid from the thermos, and put three soup spoons of herbs into paper cup until cool down, then put three pieces of cleansing cotton into the paper cup until fully absorbed. Each cleansing cotton covered the abscess 30 minutes. Use the napkin paper slightly dry up the liquid around eyes. (Figure)。

Lonicera japonica (32g)，buy in the traditional Chinese medicine shops。

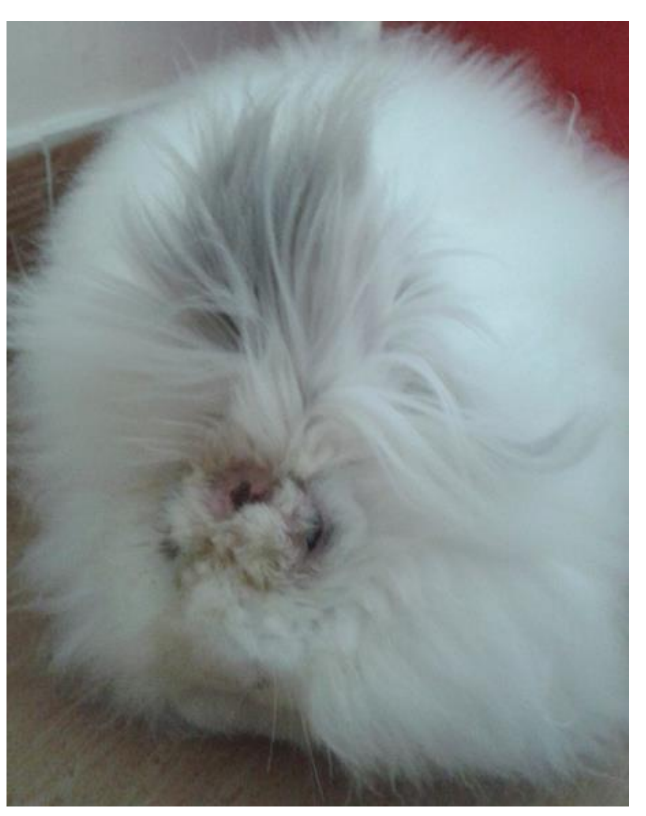

【Medication】

Every Morning and evening take (5g), about a soup spoon, put into the bunny’s food bowl, let it free to eat.

A month later, Bunny abscess formed a scab, with occasional white pus out, substance like toothpaste, the master should try to clear the white pus, which is the rehabilitation of the symptoms, but do not rush to pick out all the white pus at one-off, it will cause the bunny feels painful, just pick out little bit every time.

Keep on everyday【External dressing】

Nearly two months, Bunny abscess disappeared, the scab part back out, now waiting for the remaining bit of wound healing, surrounded by hair gradually grow. (taking a nap when bunny sleep)

Keep on everyday【External dressing】

Bunny keep it up！Mammy love you！

Wishing all bunnies to be healed！
